

Form for Preparation of a Work Plan for Mineral Exploration in Labrador Inuit Lands

Any person who wishes to carry out an Exploration Program in Labrador Inuit Lands must submit a Work Plan to the Government of Newfoundland and Labrador and the Nunatsiavut Government detailing the proposed Exploration Program for approval.

The Work Plan must be submitted by e-mail to:

Exploration_Approval@gov.nl.ca

and

harry_borlase@nunatsiavut.com

The text of the Work Plan must be attached and submitted as a Word file.

Maps and Plans included with the Work Plan must be attached and submitted as ArcView Shape Files (.shp, .dbf, .prj and .shx) and Adobe Acrobat Portable Document Format (pdf) file.

Applicants are encouraged to submit applications as early in the calendar year as practicable in all cases at least 30 days before the planned start of the work. Applicants are also encouraged to communicate with Nunatsiavut Government officials for purposes of seeking their informal views with respect to proposed Work Plans before finalizing them and formally submitting them for approval.

Any informal view expressed by Nunatsiavut Government officials is of no force or effect and is not intended to predetermine the outcome of Nunatsiavut Government's consideration of whether the Work Plan is consistent with, or conforms to, the Standards.

The Work Plan must be certified to be true, accurate and complete by the Applicant or, if the Applicant is not a natural person, the exploration manager of the Applicant.

WORK PLAN FOR MINERAL EXPLORATION IN LABRADOR INUIT LANDS

Company Name: _____

Mailing Address: _____

Exploration Manager: _____

Phone, Fax, Email: _____

24/7 Emergency Contact Information: _____

Field Project Manager(s) _____

Field Contact Information: _____

Project Name: _____

Principal and Accessory Mineral Commodity(ies): _____

NTS: _____

Mineral Licences to be Explored: _____

Labrador Inuit Land Parcels to be Covered by Exploration Program: _____

Maps and Plans:

1. Location Map - page size; showing mineral exploration site, LIL parcel, NTS boundaries, nearby Inuit community(ies); appropriate scale in the range of 1:250,000 to 1:1,000,000.
2. Work Plan Activity Map(s) - 1:50,000 - this map or series of maps will identify with precision all activities and ancillary land uses that will take place under the Work Plan. All items included in 2.3 of the Standards must be located or depicted on these maps.
3. Detailed Work Plan Activity Maps - 1:10,000 - in areas where multiple activities or land uses listed in 2 (c), (f), (g), (h), (i), (j), (k) are within 200 m, detailed location maps must be submitted.

Descriptive Text:

1. Describe the visibility of the site from the nearest Inuit community(ies) and dwellings, roads and other features and facilities such as look-offs and parks:
2. Describe the site including the nature and extent of topsoil and other overburden and the type of vegetation cover over the land to be affected by exploration activity:
3. Details regarding the means of accessing the site:
4. Summarize any prior exploration activity carried out by the applicant at the site including prior permits and leases:
5. Describe (identification and composition) all consumable materials to be stockpiled or stored on site:
6. Detailed description of all infrastructure and facilities to be constructed for purposes of accessing the site and carrying out the exploration program:
7. Describe any boat launch, dock, float or other type of mooring proposed as part of the exploration program as per 17.2.1 of the Standards:
8. Detailed description of exploration activity to be carried out:
9. Describe the source of all water to be used in the exploration program and their geographic locations:
10. Fully describe all water withdrawal and transmission facilities including the total capability of the water withdrawal facilities, the total withdrawal capability per day and the amount to be withdrawn from each water source, the uses to be made of the water, the place or places of use, discharge treatment and discharge facilities, and the place or places of discharge:
11. Describe measures to be used at the site to delineate and mark the Site on the ground, identify the Plan Holder and protect the safety of individuals entering the Site:
12. Describe the schedule of site visits by a representative of the Nunatsiavut Government as per 3.2 of the Standards:
13. State how exploration on Labrador Inuit Lands will maximize employment opportunities for Labrador Inuit and the purchase of goods and services from Labrador Inuit businesses:

14. Identify any endangered or threatened species in the vicinity of the site and any known sensitive areas or sensitive time periods for fish, wildlife of their habitat:
15. Identify the location of trap lines, camps, cabins or other evidence of recent use and occupancy that exists in any area in which exploration activity may be carried out:
16. Specify the amount of the financial security to be provided:

Appendices:

1. Environmental Protection Plan
 - a. Personnel Orientation and Training
 - (1) recognition of Historic Resources
 - (2) educational awareness program for potential encounters with polar bears
 - b. Use of vessels - 17.2.1 of the Standards
 - c. Waste Management Plan as per Section 19
 - d. Emergency Response as per Section 20
2. The EPP is to specify the procedures to be followed and the methods to be used for avoiding spills of fuels and hazardous materials at drill sites. The EPP is to specify the reporting, containment and clean up procedures that must be followed in the event of a spill of fuel or hazardous material at a drill site.
3. Reclamation and Closure Plan
4. Health & Safety Plan for Uranium Exploration Programs
