

Second dose of COVID-19 vaccine for residents of Makkovik

Public Health staff from the Nunatsiavut Department of Health and Social Development are scheduled to be in Makkovik on Monday, February 8 to administer the second dose of the Moderna COVID-19 vaccine to all eligible residents, 18 years of age and older.

Public Health staff will arrange times for eligible individuals to receive the vaccine, which will be administered at the Town Hall.

The Moderna vaccine requires two doses to be effective. The first dose was administered in all five Labrador Inuit communities the week of January 11.

Those who have yet to receive the vaccine, and wish to do so, are asked to contact your Public Health Nurse.

The Nunatsiavut Government continues to work with all relevant authorities to ensure the vaccine is administered as quickly as possible in a safe and efficient manner.
