Inoculation rates for COVID-19 vaccine

The Nunatsiavut Government today released the latest data on the number of residents in each Labrador Inuit community that have received the COVID-19 Moderna vaccine.

The table below shows the number of residents 18 years of age and older who were eligible to receive the vaccine, along with the numbers of doses administered and the overall percentage in each community.

Community	Population	Dose 1	% Dose 1	Dose 2	% Dose 2
Makkovik	221	194	87.8%	179	81.0%
Hopedale	443	389	87.8%	344	77.7%
Nain	775	603	77.8%	562	72.5%
Rigolet	221	219	99.1%	212	95.9%
Postville	147	111	75.5%	112	76.2%
Total	1807	1516	83.9%	1409	78.0%

The Moderna vaccine requires two doses. The administration of the second dose is ongoing.

The Nunatsiavut Government is pleased with the high percentage of doses administered thus far, and continues to work with all relevant authorities to deliver the vaccine as quickly as possible in a safe and efficient manner to all eligible residents within the Labrador Inuit Settlement Area.
