RESIDENTIAL REPAIR ASSESMENT SERVICES
AFFORDABLE WARMTH NUNATSIAVUT HOME REPAIR PROGRAM 2021

Issue Date:
June 22, 2021

Closing date and time:
July 14, 2012 at 4:00 ADT

Project Overview, Objectives and Scope

The Nunatsiavut Government (NG) was established in 2005 following the establishment of the *Labrador Inuit Land Claims Agreement* (LILCA). LILCA includes self-government provisions rendering the NG a regional Inuit government within the province of Newfoundland and Labrador. The NG has authority over many central governance areas including health, education, housing, culture and language, justice and community matters.

The Nunatsiavut Housing Needs Assessment conducted in 2012 revealed that roughly 75% of homes in Nunatsiavut are in need of general repair. As a result, the Nunatsiavut Government developed and has been implementing a home repair program to provide general home repairs to Labrador Inuit residents in the five (5) Inuit Communities of Nunatsiavut (the “Program”).

Through an open application process, the Nunatsiavut Government has identified a list of 26 homes throughout Nunatsiavut to be assessed to determine the scope of potential repairs required. The homes are located in the following communities:

- Nain - 10
- Hopedale - 5
- Makkovik - 3
- Postville - 2
- Rigolet - 6

Through this Request for Proposals, the NG is seeking proposals from qualified firms to provide building assessment inspections and repair estimate reports for each of the identified homes.

The successful proponent will provide the following services to the NG:

- Detailed inspection reports for each house, which must include:
 - evaluating all exterior elements including siding, windows, doors, soffit and fascia, trim details, and visual condition of the foundation including an assessment of the stability of the building lot;
 - evaluating the condition and levels of the attic insulation, ceiling vapour barrier, soffit/roof ventilation and any existing bathroom fans, as well on scope of work required to bring the attic insulation to R-60 by use of blow-in cellulose insulation.
 - evaluating the condition of all interior elements and systems including electrical (minimum upgrade to a 200AMP electrical service) and plumbing;
 - thorough examination in all areas of the home for the existence and/or prevalence of mould and opinions on the likelihood of mould existing but not visible without destructive examination; and,
 - a cost estimate of the works to each house approved for the Program.

Requirements

Specific requirements outlined below do not constitute the final terms of an agreement or an engagement. A formal written agreement between the two parties will determine the ultimate terms.

Mandatory Requirements

Proponents must be capable of providing accredited professional services and have experience in building inspections, with emphasis on residential inspections preferred. Consultants and all team members must state their professional qualifications and certifications including authorizations to undertake their disciplines in the Province of Newfoundland and Labrador.

Evaluation Criteria for Proposals

The NG will evaluate each Proposal received in response to this RFP using the following criteria, which is not intended to be exhaustive and is not ranked in order of preference or priority:

- a) Completeness, thoroughness and relevance of the Proposal submitted in response to this RFP;
- b) Relevant experience of the firm;
- c) Relevant experience and knowledge of key personnel;
- d) References, including the contact information of former clients;
- e) Inuit Content as outlined in the Nunatsiavut Government’s *Procurement Act*; and
- f) Other criteria as may be applicable.

The NG reserves the right to discuss any and/or all proposals, and to request additional information from the proponents.

A contract, if awarded, will be awarded in accordance with Nunatsiavut’s’ *Procurement Act*. Proponents are advised that although price and Inuit content will be considered the NG may not accept the lowest-cost proposal nor will the proposal with the highest ranked Inuit content score be necessarily accepted. The NG reserves the right to cancel this RFP at any time. Any proposal that is accepted may be accepted in whole or in part.

The *Procurement Act* will be used to determine the Inuit Content Factor of the submissions and the weighting of the points assigned in this category. **It is the responsibility of proponents to show, in their proposal, a calculation of the Inuit Content Factor for the proponent, even if the score is 0. Failure to complete the Inuit Content Factor calculation may result in the proposal being screened out.**
